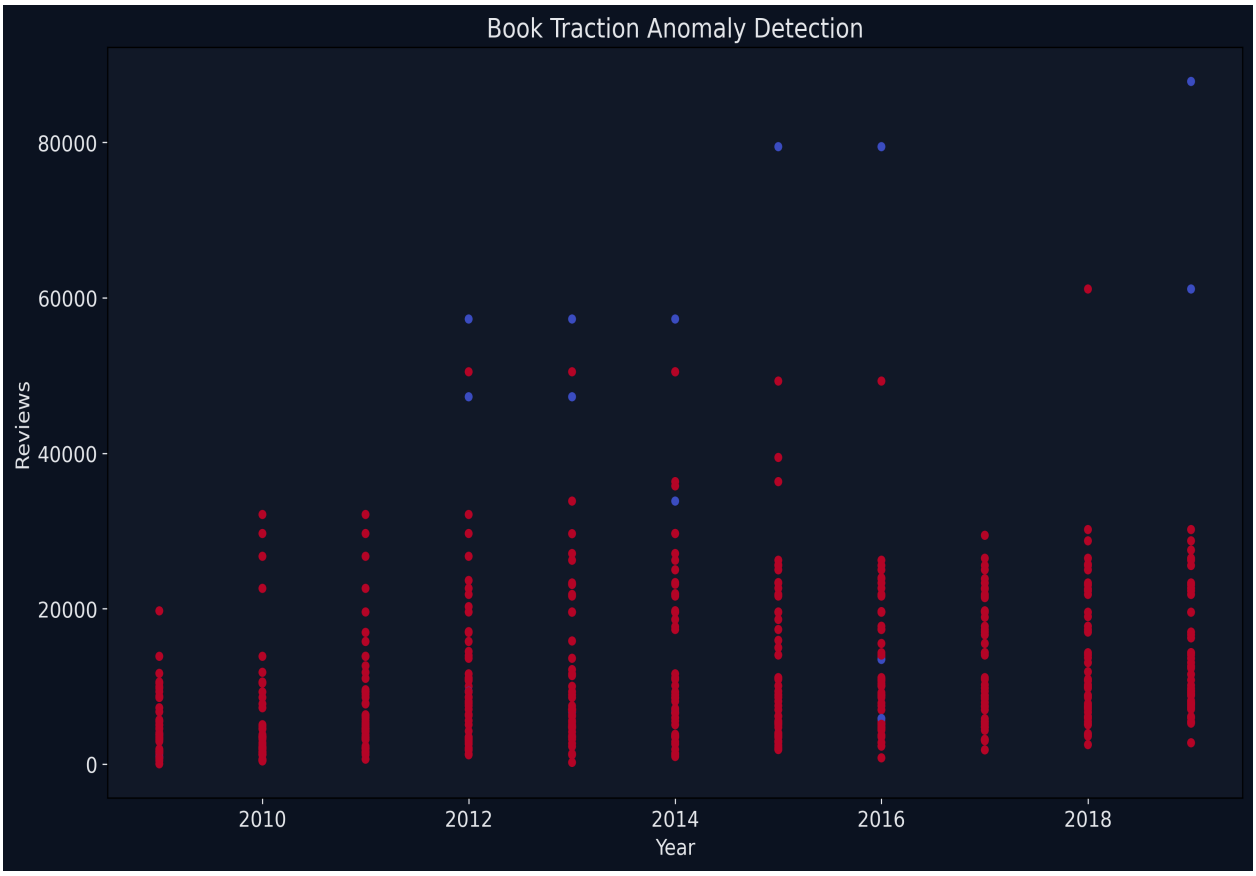
Book Market Intelligence Report

Executive Summary

Dataset Size: 550 books
Years Covered: 2009 to 2019
Cluster Quality Score: 0.325
Execution Time: 7.55 seconds

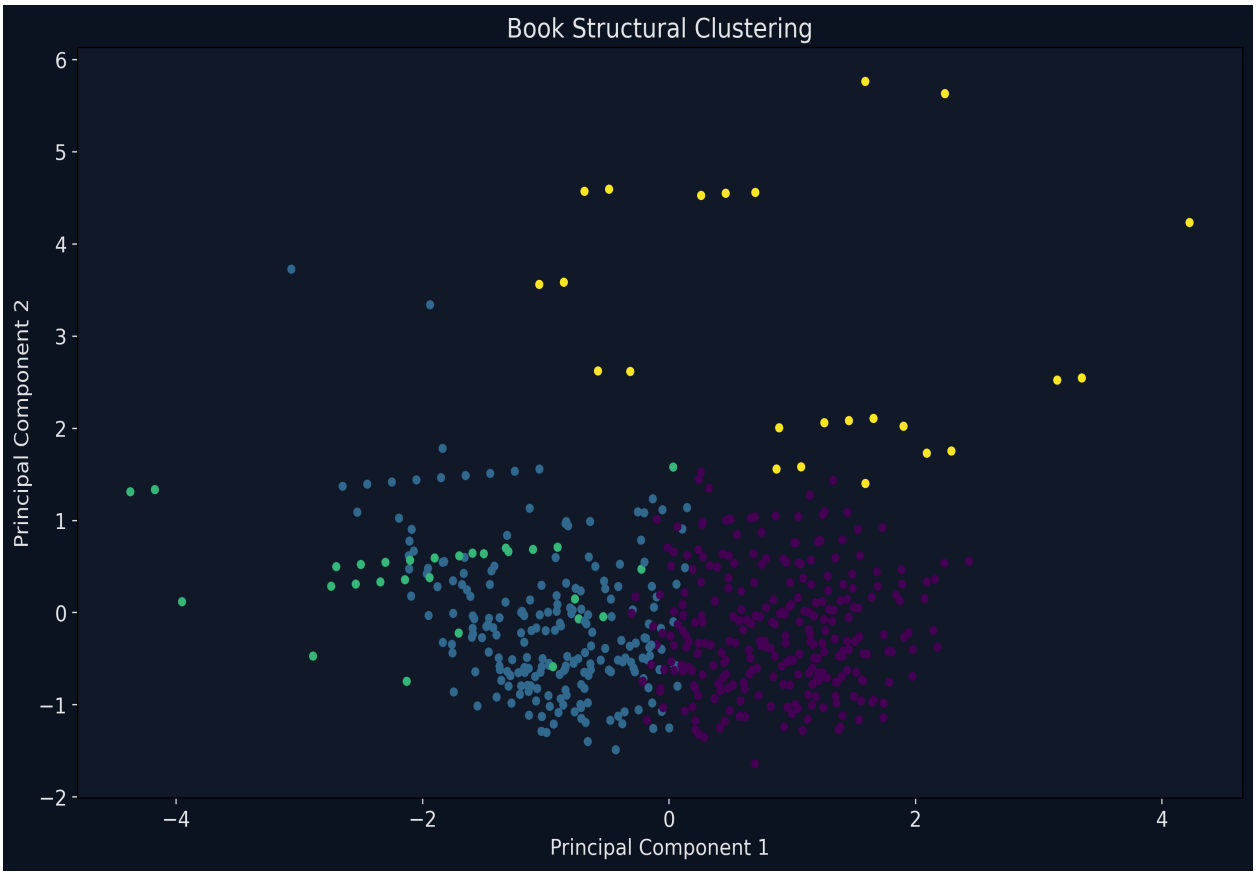
This report provides structural intelligence, genre traction analysis, and buyer preference recommendation modeling.

Anomaly



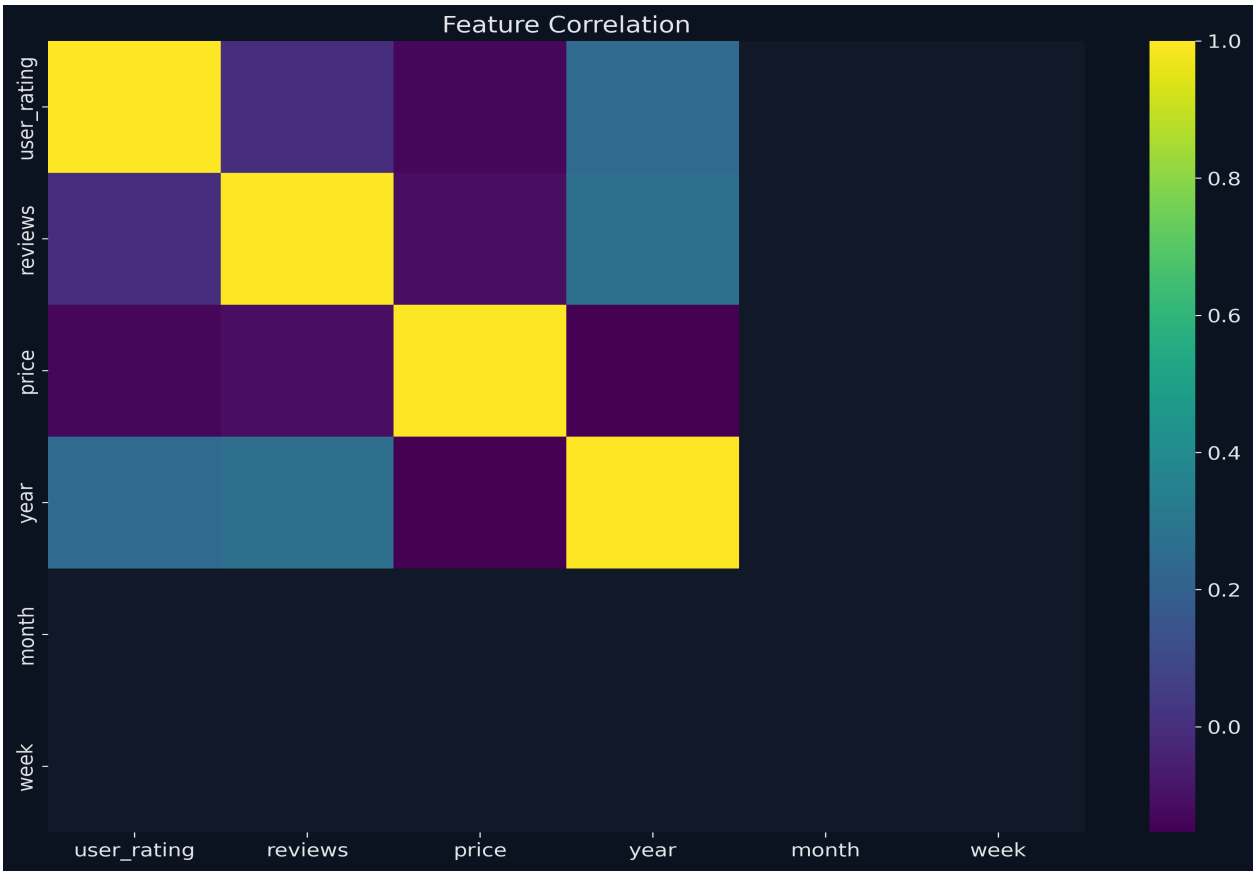
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Cluster



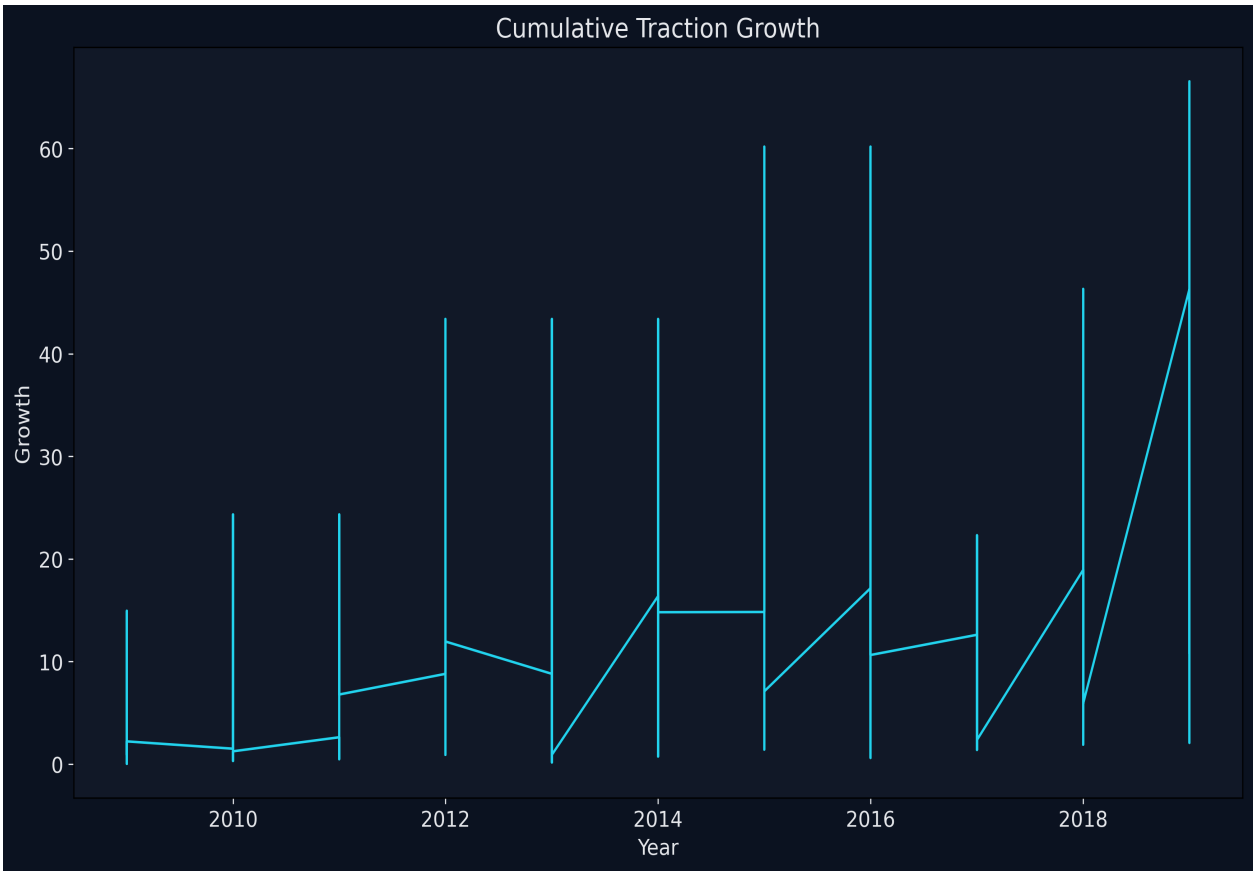
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Correlation



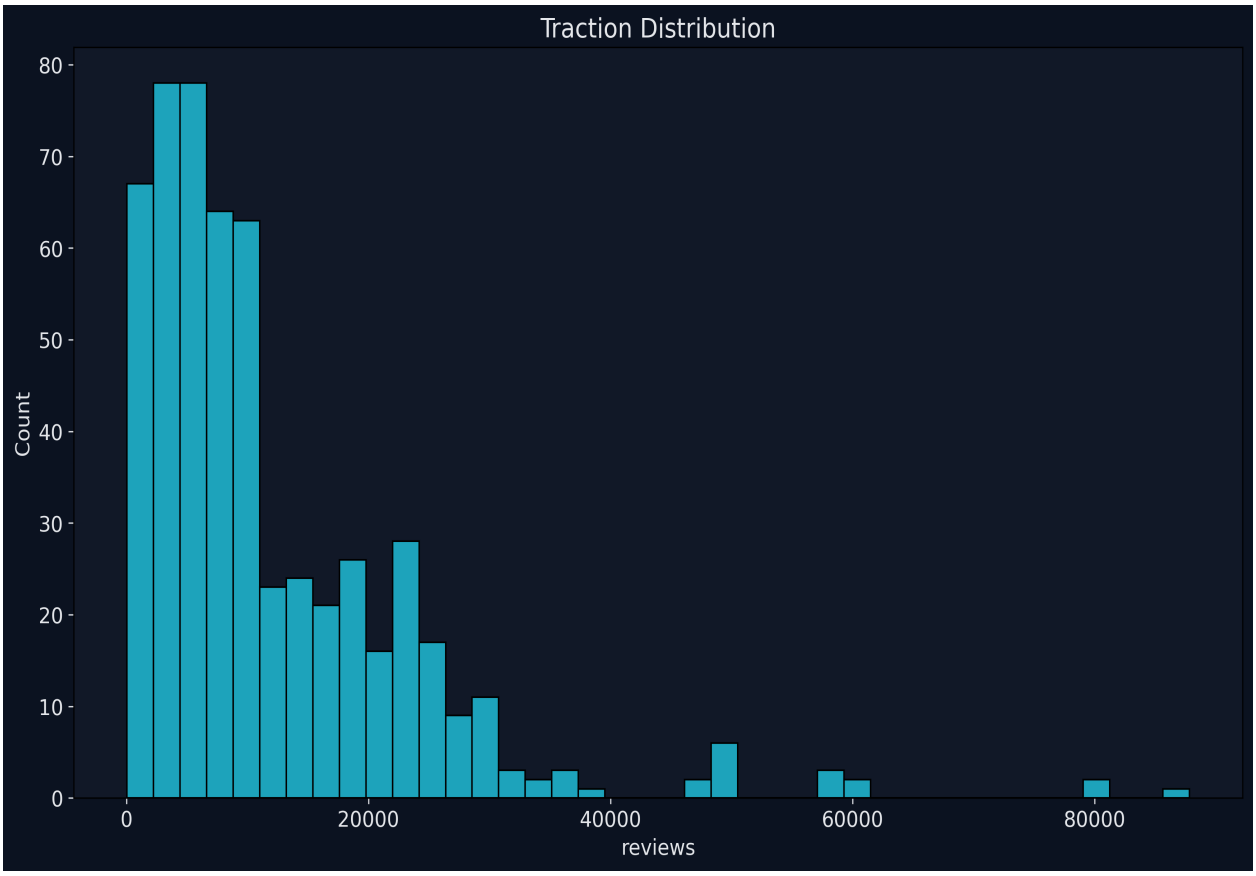
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Cumulative Return



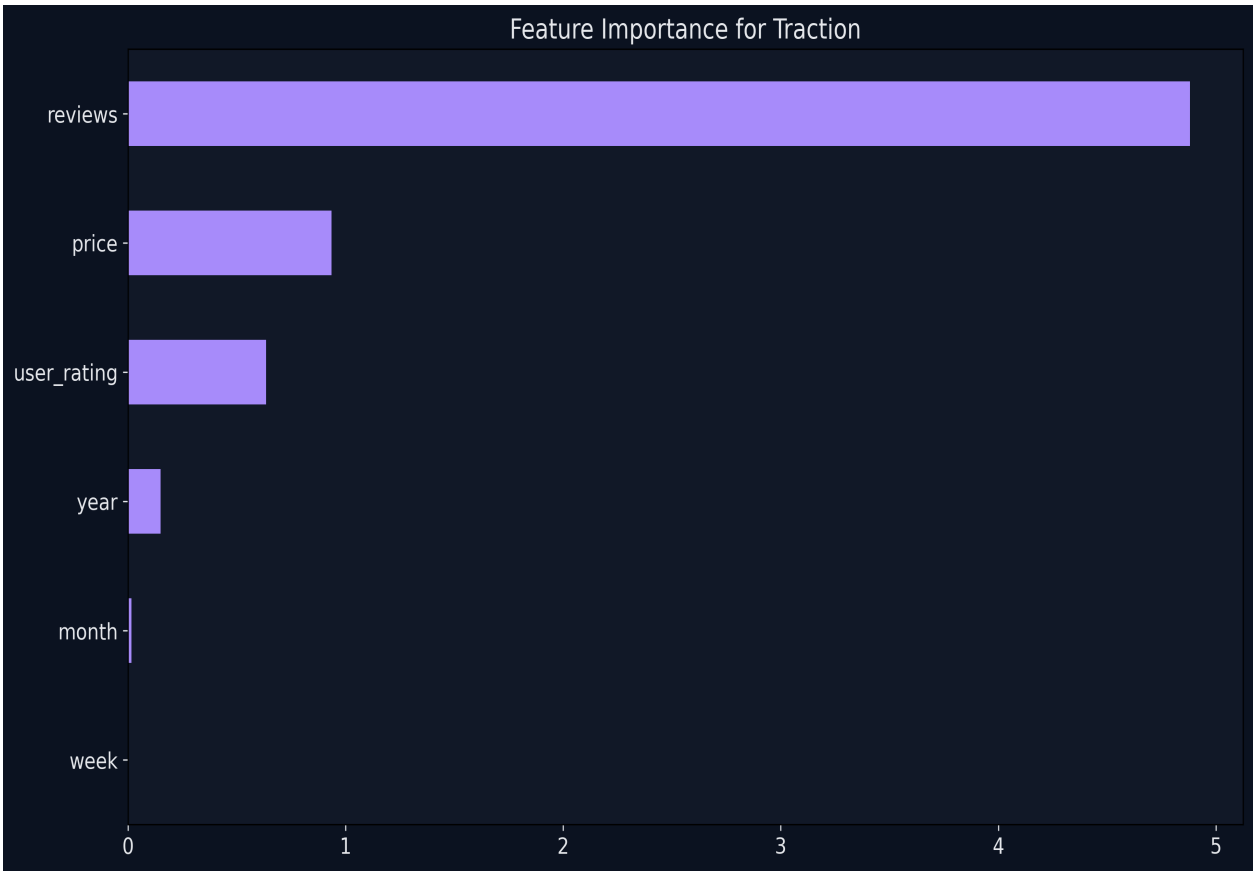
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Distribution



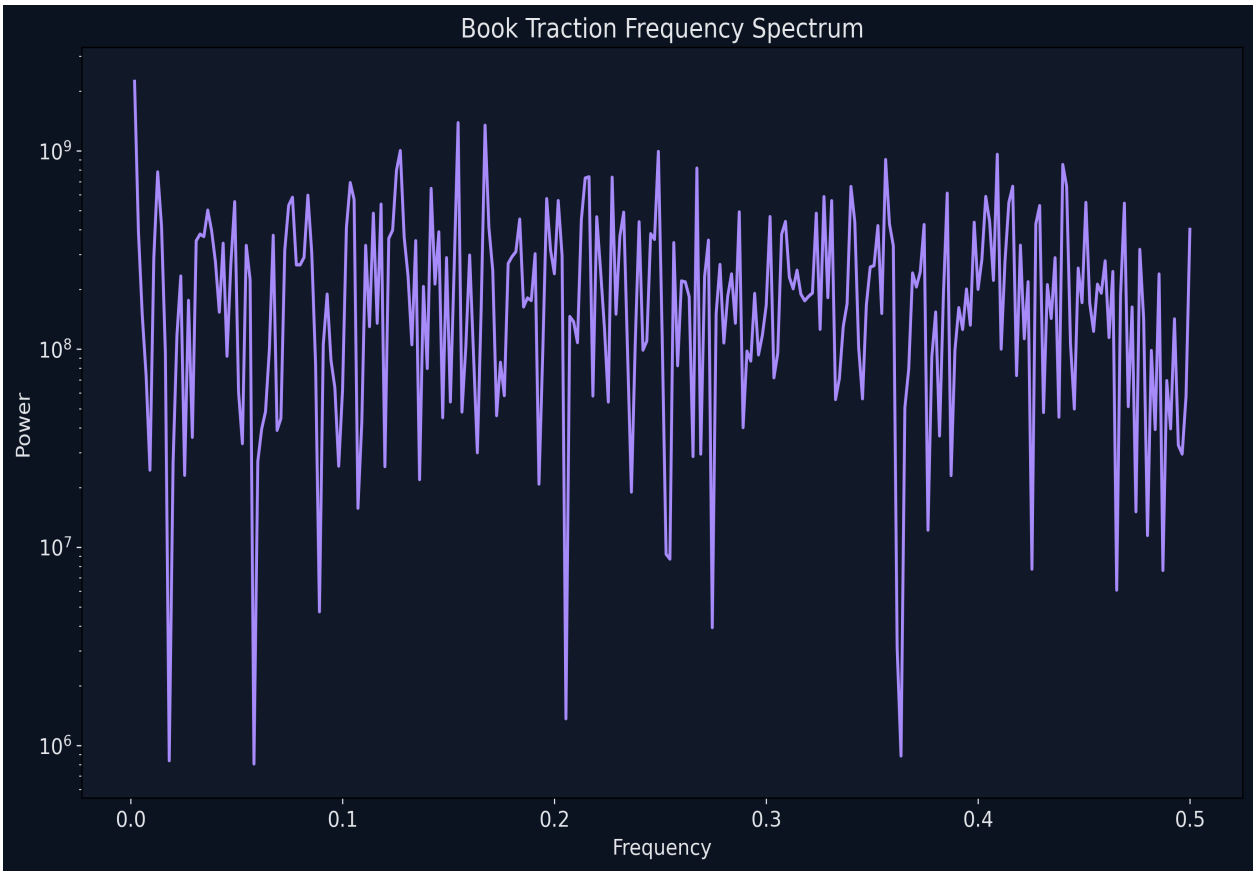
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Feature Importance



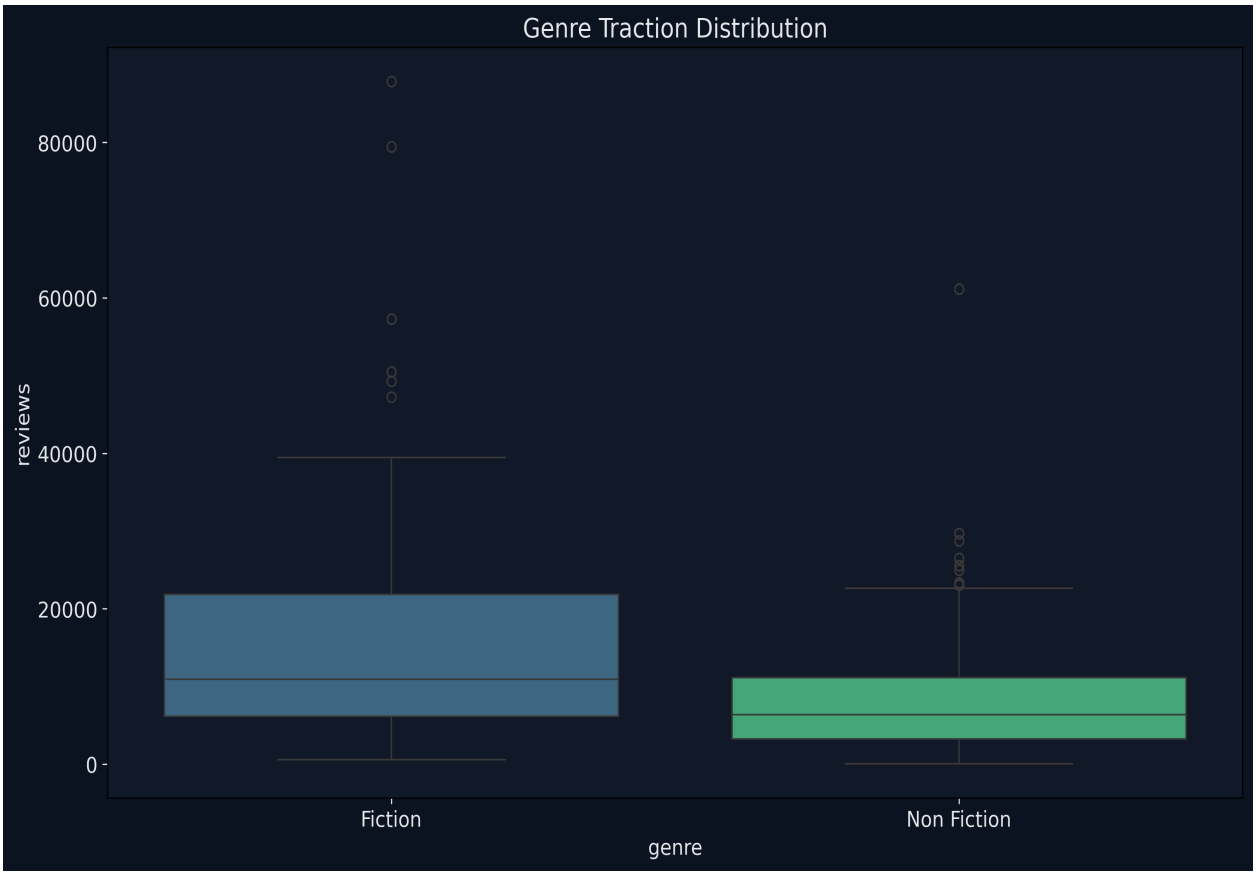
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Fourier



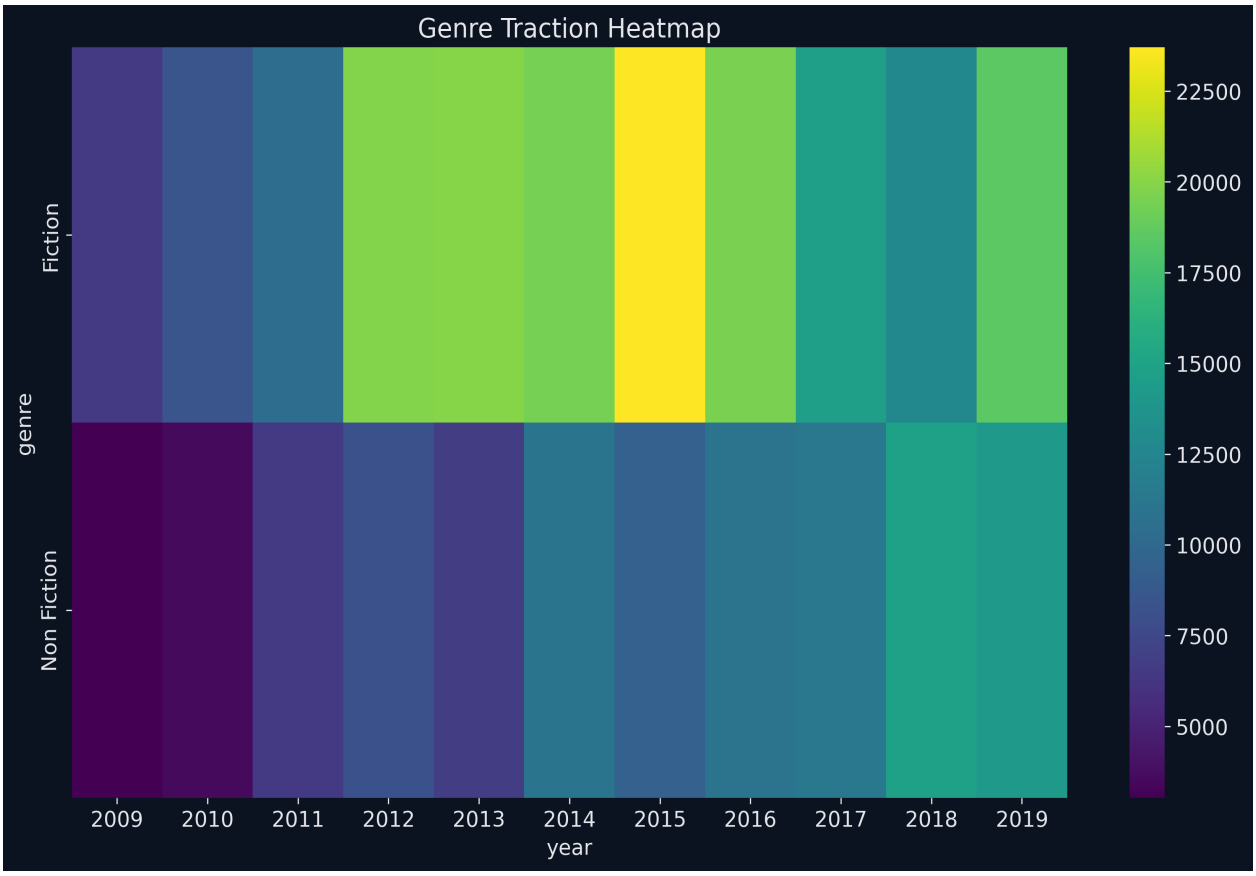
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Genre Boxplot



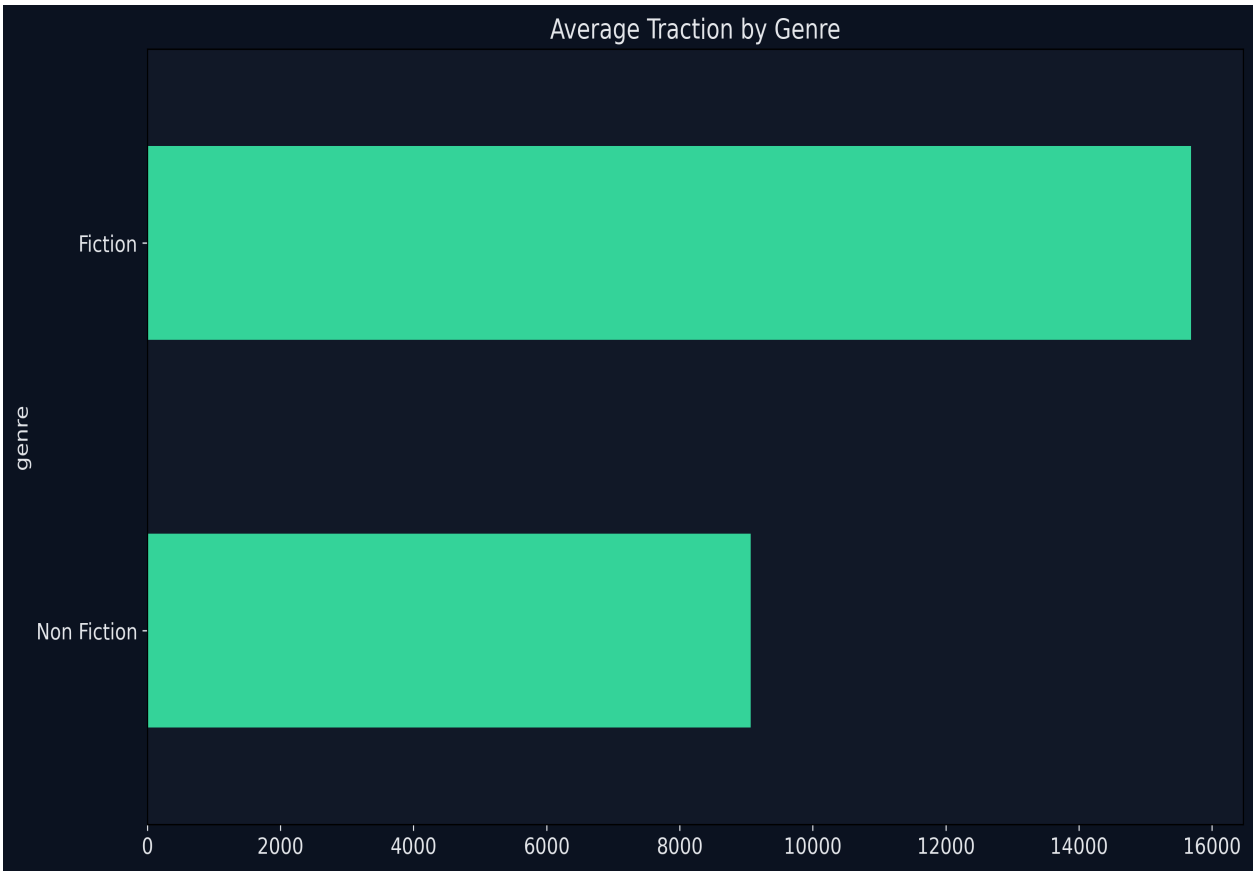
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Genre Heatmap



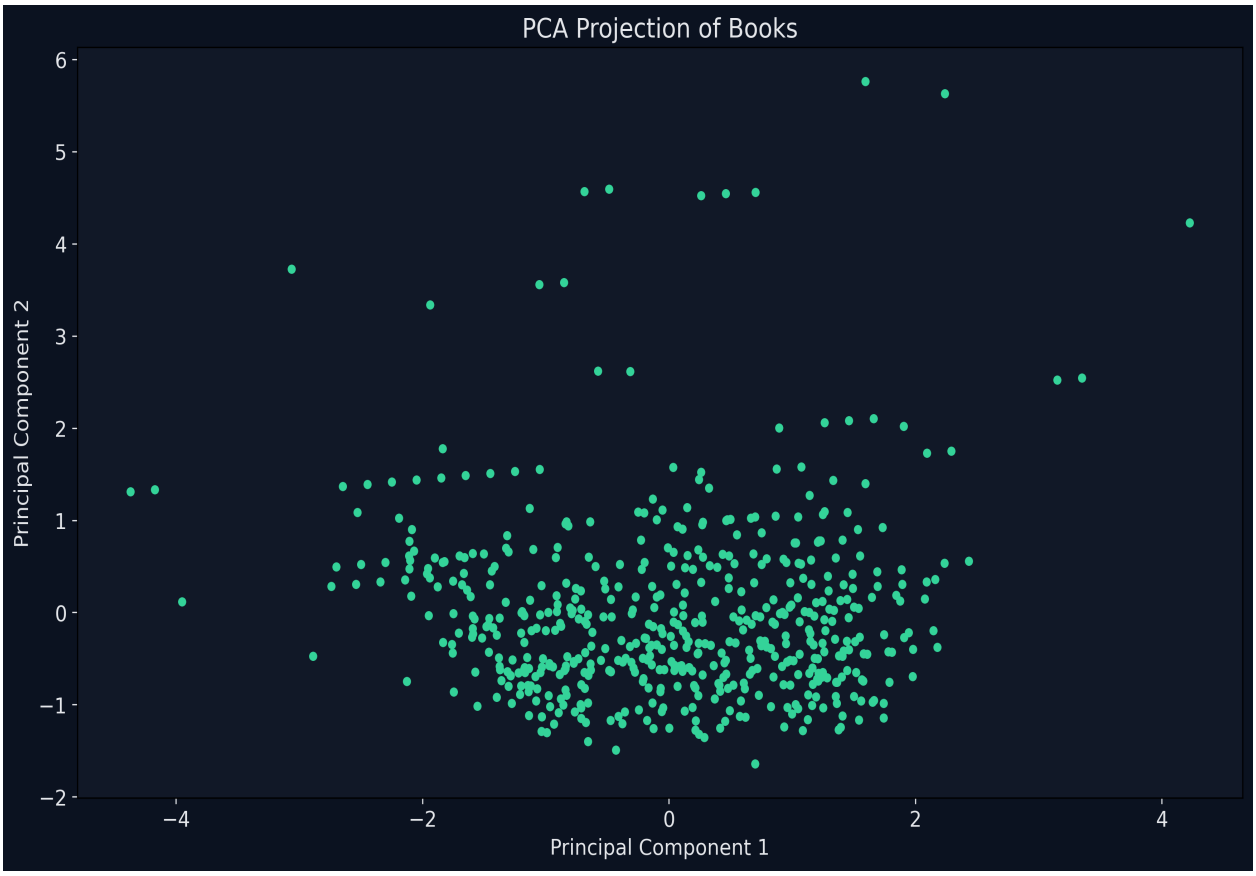
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Genre Trend



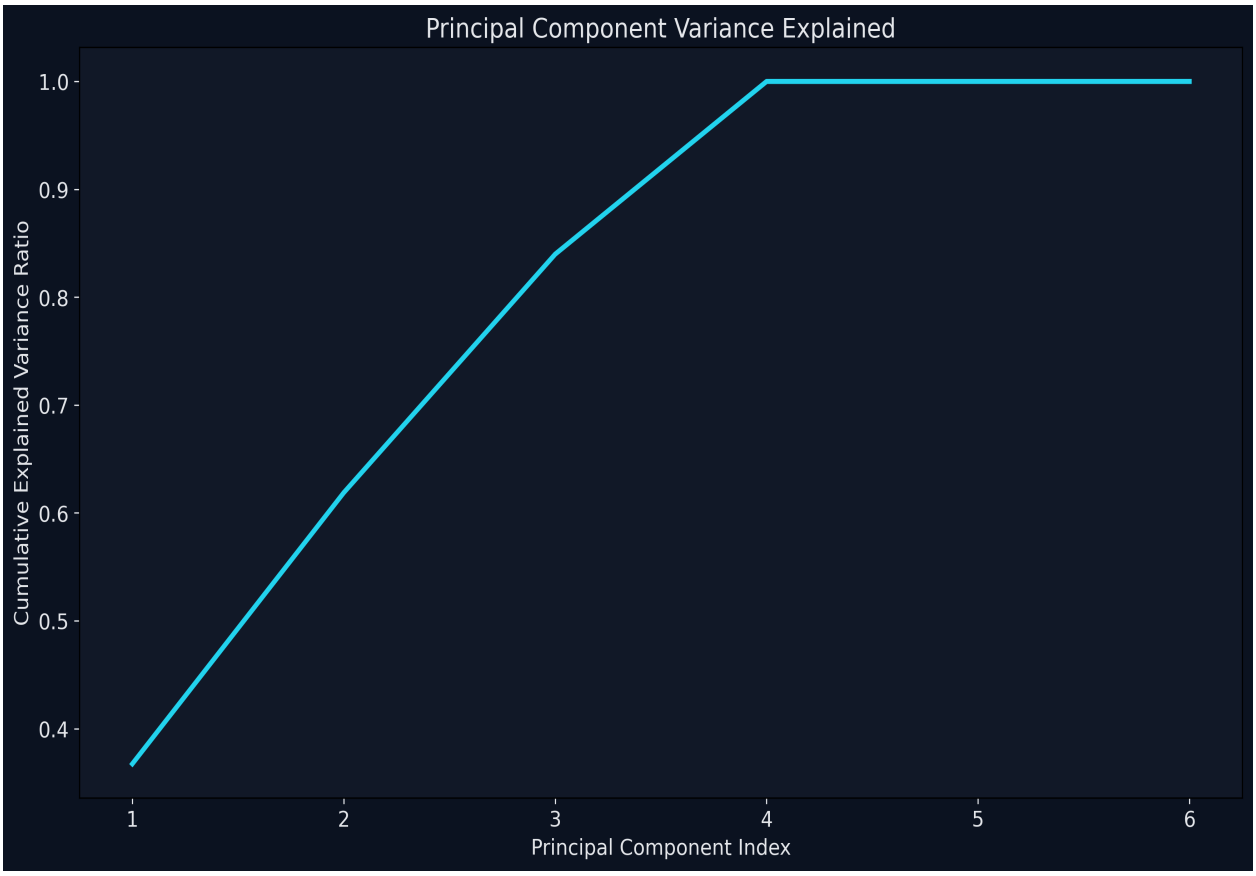
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Pca Projection



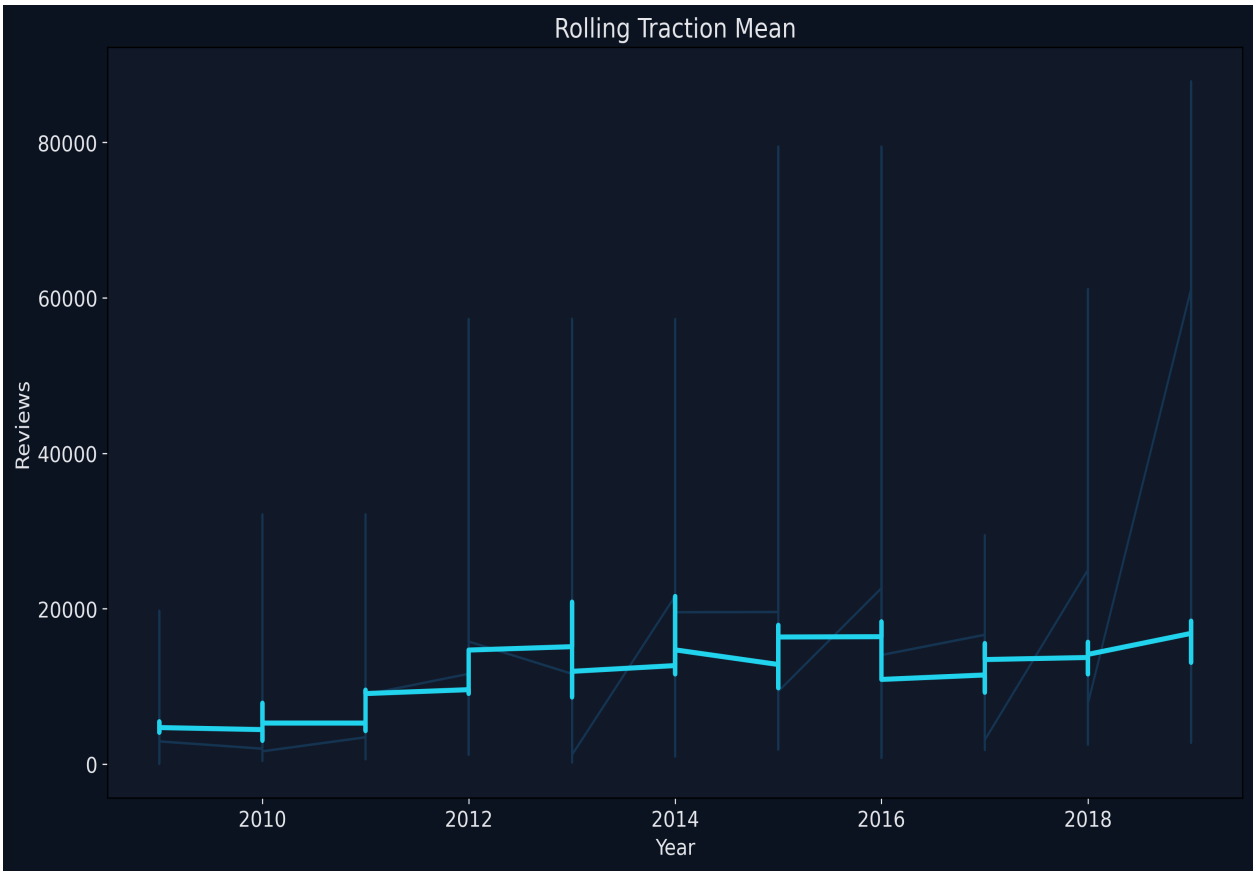
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Pca Variance



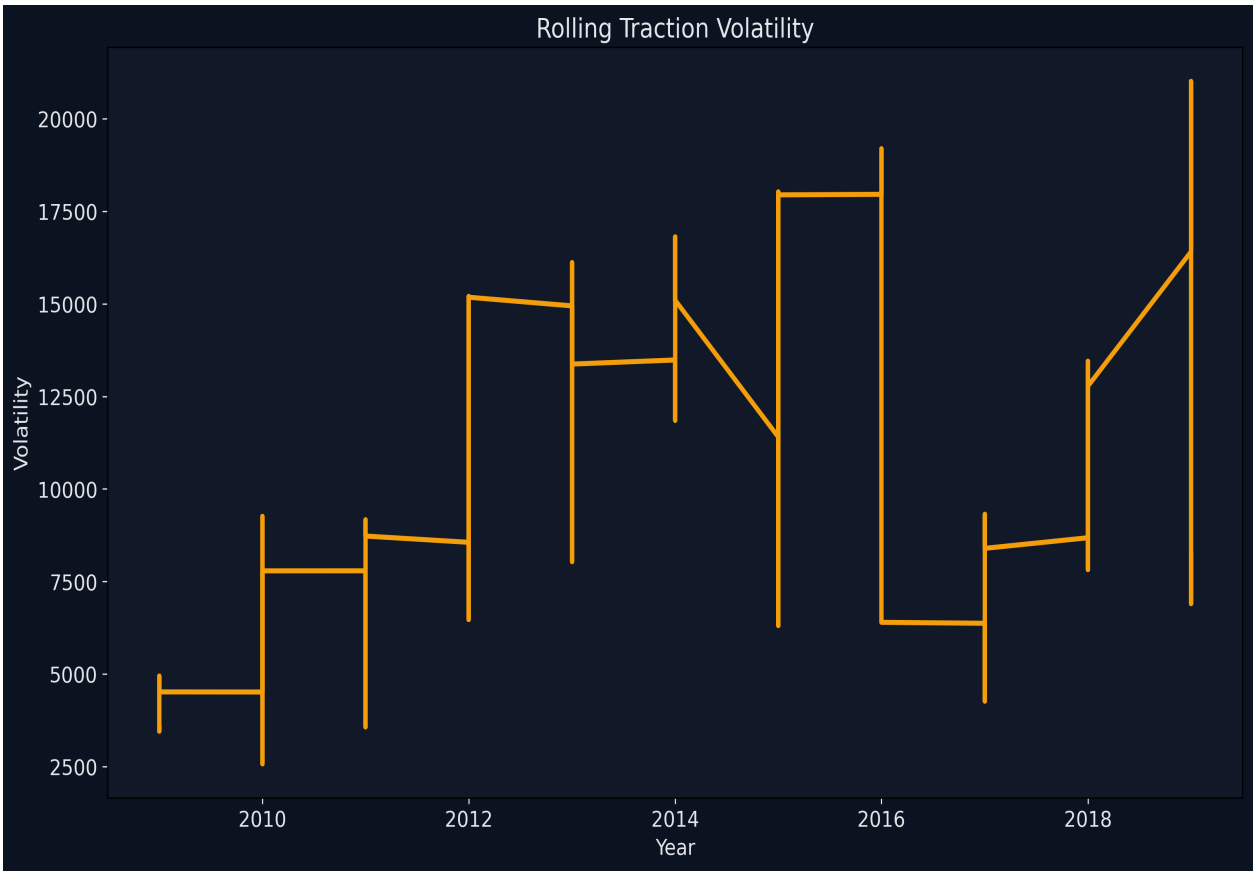
This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Rolling Mean



This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.

Rolling Volatility



This chart presents structural intelligence extracted from buyer behavior and genre traction patterns.
